

Valencia Airport VLC (Spain)

Case Study

Valencia Airport is located in Manises, 8 km west of Valencia, in Spain. In time for the America's Cup in 2007, this international airport was modernized and expanded, and received, among other new features, a new terminal building.

Again, the tried-and-tested record FlipFlow TWIN models are installed here, smoothly controlling the flow of passengers and preventing unauthorized access to the restricted zones.
